

Xiang-Yi Niak

Data & BI Reporting Analyst

Christchurch | 027 268 8162 | spencerniak@gmail.com | linkedin.com/in/sniak718

PROFESSIONAL PROFILE

Data and BI analyst with 4+ years in analytics and reporting across logistics and operations, progressing from Tableau and advanced Excel reporting to Power BI dashboard development. Skilled at turning operational data into clear, decision-ready reporting and KPIs for non-technical stakeholders. Master of Applied Management in Business Analytics (NMIT), now applying DAX, Power Query, and dimensional modelling to real warehouse operations data. NZ Open Work Visa valid to January 2029 — full work rights, no sponsorship required.

CORE SKILLS

Reporting & Analysis: Data synthesis & insight generation, Power BI report development, KPI framework design, operational & management reporting, data storytelling

Data & Modelling: DAX measures, Power Query (M), star schema / dimensional modelling, SQL querying, ETL concepts, data quality & governance

Tools: Power BI, Tableau, SQL, Advanced Excel (PivotTables, Power Query, VBA), SAP, WMS

Stakeholder & Delivery: Requirements elicitation, solution walkthroughs, non-technical communication, documentation, Agile / Scrum

EXPERIENCE

Sunson Asian Food Warehouse · Christchurch, NZ

Mar 2026 – May 2026

Warehouse & Logistics Assistant (casual) — self-initiated BI project

- Built a Power BI dashboard tracking pick accuracy, fill rates, and stockouts across three sites, giving managers a live view to act on mid-shift.
- Designed a star-schema model (store, category, date) and wrote DAX measures for pick and fill rate — a reusable foundation, not a one-off report.
- Uncovered that Beverage, despite a 96.31% fill rate, drove 52.4% of all units short — reframing it as the top replenishment priority.
- Transformed and standardised raw data in Power Query (M) — cleaning, typing, and shaping inputs so the dashboard's measures stayed trustworthy and reproducible.

CTW Logistics · Taoyuan, Taiwan

Sep 2021 – Feb 2024

Management Trainee — Logistics & Analytics

- Automated recurring reporting that consumed ~8 hours per cycle, redesigning the data flow to deliver timely intelligence and free analyst time for higher-value analysis.
- Analysed a 14.5% year-on-year drop in shipment volumes in Tableau and Excel, surfacing the insight that underpinned management's successful pricing renegotiation.
- Modelled geographic shipping data in Tableau to find route-consolidation opportunities, delivering ~NZD 3,000 in annual fuel savings and strengthening sustainability reporting.
- Developed activity-based costing (ABC) models to evaluate vendor ROI, steering capital toward sub-five-year-payback investments and reducing risk on a major purchasing decision.
- Coordinated requirements across four stakeholders for a NZD 250,000 facility deployment, managing documentation, approvals, and change requests to keep the rollout aligned to business needs.
- Standardised data-entry procedures through SOPs and work instructions, safeguarding data integrity across SAP (ERP) and WMS at high daily transaction volumes.

DHL Express · Taoyuan, Taiwan

Jul 2019 – Aug 2019

Gateway Transportation Intern

- Presented a data-driven operational analysis to senior management, earning the 2019 Summer Intern Country Manager Award.

EDUCATION

Nelson Marlborough Institute of Technology (NMIT) · Nelson, NZ Feb 2024 – Dec 2025
Master of Applied Management (Business Analytics)

Relevant coursework: Business Intelligence, Dimensional Data Modelling, ETL Concepts, Data Governance, Applied Statistics, Agile Delivery, Business Systems Analysis.

National Yang-Ming Chiao Tung University (NYCU) · Hsinchu, Taiwan Sep 2017 – Jun 2021
BSc, Transportation & Logistics Management

Exchange: Reutlingen University, Germany — Baden-Württemberg Scholarship recipient.

PROFESSIONAL DEVELOPMENT

Madhatters Toastmasters · Nelson, NZ Apr 2024 – Present
Club Secretary

- Facilitated communication sessions for 20+ members and completed Presentation Mastery Level 4, sharpening the stakeholder-engagement skills central to BI solution walkthroughs.

CERTIFICATIONS

Supply Chain Analytics Specialisation — Rutgers University · Full NZ Driver's Licence (Class 1)
